

GH management

GH System GmbH is consortium leader in the research project iwald
iwald: Integral World And Local Delivery

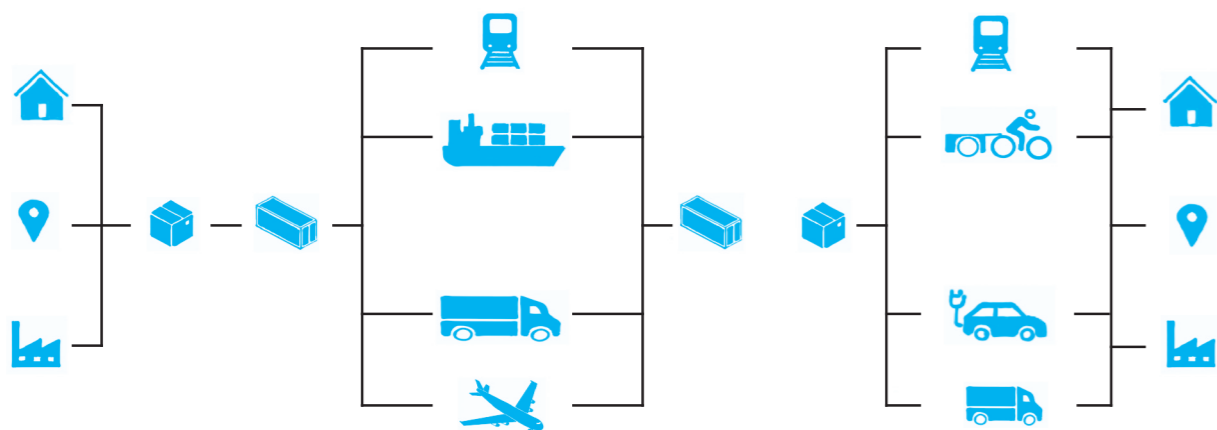

We are looking for our GH transport – logistic standardization:

The basic for automated packet logistic centres.
For intermodal traffic with the new smart GH box.
Cost savings through standardization.

SCM

Supply Chain **Management** on a new level.

High packing density.
Load securing integrated.
Data acquisition integrated.

GH management

Standardization for local and worldwide logistics.
Be part of our revolutionary standardization in logistics.

We are searching for technical and financial synergies.

The screenshot shows the iwald website with a navigation bar (Global home, News, Über uns, Jobs, Partner, FQA, Kontakt: info@globalhome-trading.de) and a grid of project cards. Each card features a logo, a title, a brief description, and a 'mehr lesen' link. The projects include:

- GH container** (WENKER): erfahrene, internationale Generalunternehmer im Bereich Anlagen und Modellbau...
- GH cube** (DIRAK): Erken zur Durchsetzung der Transport-Cubes...
- GH box** (Hilker): Entwicklung eines standardisierten Kleincontainers mit Europaplatzmaßeinheiten...
- GH trailer** (HEIMANN): Entwicklung eines Trailers mit eigenem Publiertrieb...
- GH microhub** (HEIMANN): Abwickelung zum Transport eines City-Hubs...
- GH logistic** (FIEGE): smarte, digital gesteuerte Lieferprozesse für Transporter in Gütern...
- GH management** (GH Systems): Konsortiumsführung IWALD Projekt...
- GH locallogistic** (Brief und mehr): als Projektpartner treten wir auf der LAST MILE unverkennbarlich die Brücke...
- GH engineering** (pmh): Konzeption und Entwicklung, Identifizierung und Engineering, 3D-Simulation...
- GH science** (uni-due): die Erstellung und Abbildung einer Prozesskette...

At the bottom, there are logos for the Landesregierung Nordrhein-Westfalen, the Europäische Union, and the EFRE-NRW program.

GH management

GH authentication codes and database

For protection of investments in our GH transport – logistic concept GH System developed an authentication concept in optical and digital form, presented in a QR-Code. This code is a safety access to the new logistic standard and a clearly protection against plagiarism and will work together with our worldwide tracking system, lock system and database.

GH lock

An integrated lock concept in the logistic delivery chain is in general an important element, local as well as global, for different logisticians, for boxes as well as containers or for pick-up stations. Even customs need a quick and safety access together with authentication codes in a smart lock. This unit together with a worldwide tracking system and database is the basic for a seamless and efficient supply chain.
